

# Chi-Acupuncture – Return to the Base

## Chi-Acupuncture Techniques & Clinical Application

Sponsored By

—The way to advance your skill and improve the result

This is not a dull theory lecture, this is an opportunity to learn practical techniques that you can take away and start using in your clinic to get results straight away.

### About the Presenter:

**Daniel Deng** has taught and practiced Acupuncture and Chinese Medicine in both China and Australia for over 20 years. He initially graduated from the five-year full time course in the Acupuncture and Moxibustion Department, at GuangZhou University of Traditional Chinese Medicine. What makes Daniel's workshops special is his gift of delivering natural, immediately effective solutions for complex problems within the body. **You walk away from his courses knowing you are a better practitioner for the experience**, with unique skills that may have taken years to develop any other way.

### Chi needling workshop introduces base and new skills to advance needle techniques and enhance your health.

The Art of Acupuncture is made up of many skillful techniques using Needle, Moxa and Cup. Although the tools are the same, it is the knowledge and skill of the practitioner that determines the effectiveness of the treatment. This seminar will bring you back to the base, starting with ChiGong exercises related to needling techniques, which will also benefit your own health, and include classical needle techniques, all the way to the final clinical applications you can use them on in your own clinic.

### What you will learn in the workshop:

- The principle of spirit, ChiGong exercises which related to the needling techniques development and enhance your body health.
- Improve the sensitivity and strength force of your finger to get a better understanding of the body and clinical result.
- Base techniques in a special styles (Chi needling to get a better result, Fly needle to reduce the insertion pain, Cupping without the blues, flash cup to improve the circulation and Wei qi. Special Moxa techniques, And more... ..)
- Effective special tonification & reducing needle techniques.
- Classical needling techniques ( Fire needle. One needle few direction, And more... ..)
- Needling techniques clinical application

This is a not to be missed opportunity to learn practical techniques that you can take away and start using in your clinic to get results. There will be time for practice within each section so you can be confident of taking the skills away with you and knowing that you can apply them effectively.
